BURNER REPLACEMENT KIT INSTRUCTIONS Kit #550003278

FOR UCS & DMG 380 BOILER

Kit installation shall be completed by qualified agency.

WARNING

Fire, explosion, asphyxiation and electrical shock hazard. Improper installation could result in death or serious injury. Read this instruction and understand all requirements, including requirements of authority having jurisdiction, before beginning installation. Installation not complete until appliance operation verified per Installation, Operation & Maintenance Manual provided with boiler.

ACAUTION

Laceration, burn hazard. Metal edges and parts may have sharp edges and/or may be hot. Use appropriate personal protection equipment to include safety glasses and gloves when installing or servicing this appliance. Failure to follow these instructions could result in minor or moderate injury.

 Follow instructions TO TURN OFF GAS TO APPLIANCE found on Operating Instructions label on boiler or in Installation, Operation & Maintenance Manual. Verify all electrical power to boiler is turned off.

WARNING

Electrical shock hazard. Turn OFF electrical power supply at service panel.

- **2.** Turn power and gas off to appliance.
- **3.** Remove two (2) screws from jacket cover. Lift jacket off.

WARNING

Burn hazard. Verify unit has cooled before servicing. Use appropriate personal protection equipment.

- **4.** Inspect combustion chamber through sight glass. Verify flame is not present. See figure 1.
- **5.** Disconnect two (2) wire harnesses from fan motor. See Figure 2.
- **6.** Disconnect nut securing gas valve to gas air mixer. Remove gasket.
- **7.** Remove four (4) screws securing control support backet. Release tabs securing control. Place control assembly on bottom of boiler.

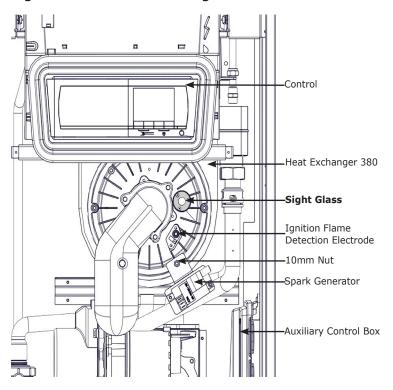

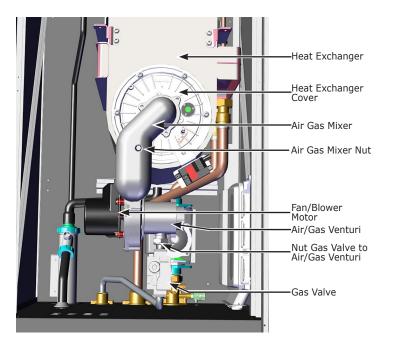

Figure 2 - Control Panel and Bracket Removed

BURNER REPLACEMENT KIT INSTRUCTIONS

- **8.** Remove three (3) bolts securing air gas collector assembly to combustion chamber cover, set aside.
- 9. Remove burner gasket and burner. See Figure 4.
- **10.** Install new burner with gasket. Line notch in burner to notch on combustion chamber cover. See Figure 5.
- **11.** Secure air gas collector to combustion chamber cover with three (3) bolts.
- **12.** Place new washer between gas valve and air/gas venturi with. Tighten nut. See Figure 4.
- **13.** Secure control and support bracket in place with (4) removed screws.
- **14.** Return control assemlby to upright position. Engage tabs to secure.
- 15. Reconnect two (2) wire harnesses to fan motor.
- 16. Turn power and gas on. Check for leaks.
- 17. Adjust Parameters 17-19 as indicated A-D:

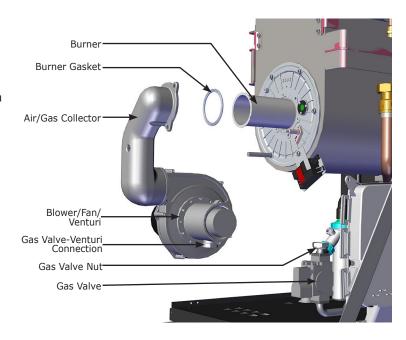

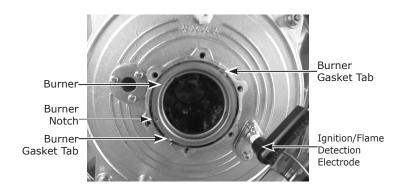

Figure 5 - Burner Gasket Tabs

BURNER REPLACMENT KIT INSTRUCTIONS

A - Installer Level Parameters

Parameters **P17** to **dF** (error code history) must only be modified by a qualified installer.

To prevent unwanted settings, some parameter settings can only be changed after special access code **0012** is entered.

- Press the two Menu buttons (+) button until the symbol flashes on the menu bar.
- Select the INSTALLER menu using the button. "CODE" appears on the display.
- Use (-) or (+) button to input the installer code "0012".
- Confirm using button, "P1" is displayed with "1" flashing.
- Press button a second time, the value will appear and flashes, for example [80°C (176°F)].
- Change the value by pressing the [-] or [+] button. [In this example using [-] button to change the value to 60 °C (140 °F).]
- Confirm the value with the button, "P1" is displayed with 1 flashing. Button, "P1" is displayed with 1 flashing. If necessary, set other parameters by selecting them using the (-) or (+) button.
- Press button 2 times to return to current operating mode.

Natural Gas				Propane			
Air/Gas Mixture		No	zzle	Air/Gas Mixture		Nozzle	
in	mm	in	mm	in	mm	in	mm
1 3/16	30	⁷ / ₃₂	5.3	1.18	30	5/32	4

FIGURE 7 - Installer Level Parameters

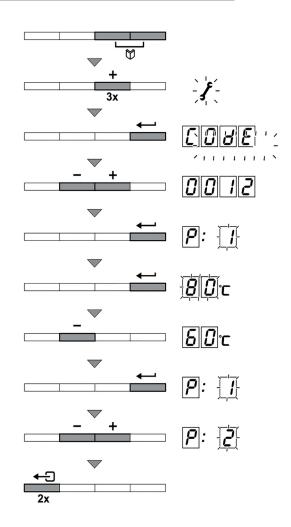

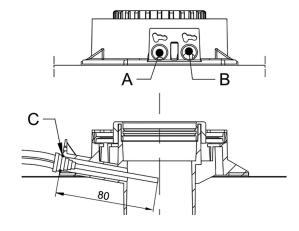

FIGURE 8 - Combustion Air Temperature Ports

B - Boiler has two dedicated built in test ports. See Figure 8.

One connection port is connected to exhaust flue (\mathbf{A}) , and allows monitoring of the quality of combustion products and combustion efficiency.

Other is connected to combustion air intake (\mathbf{B}) , used to check for recycling products for combustion.

The following can be measured at exhaust flue test port:

- temperature of combustion products
- oxygen (O₂) or carbon dioxide (CO₂) concentration;
- carbon monoxide (CO) concentration.

Temperature of combustion air must be measured on air intake test port ($\bf B$) by inserting measurement sensor approximately 3-3/16" (80.00 mm) ($\bf C$).

BURNER REPLACMENT KIT INSTRUCTIONS

C - Combustion Setup (High-Fire)

- Unscrew exhaust port plug at exhaust flue test port. See Figure 8.
- Insert combustion analyzer into exhaust flue test port.
 Verify opening around combustion analyzer probe is completely sealed when taking measurements.
- Set boiler to high-fire by pressing two buttons simultaneously. Display will show **H3** and the symbol will appear.
- Measure percentage of O₂ or CO₂ in flue gases.
- Compare the measured values with values in table below.
 Remove front panel when comparing values.
- Adjust gas/air ratio using high-fire adjustment screw (V)
 if needed. Turn screw clockwise to reduce CO₂ level and
 counterclockwise to increase it.

0 ₂ /CO ₂ Values at High Fire Natural Gas				
Nominal	value	Permitted value		
O ₂ %	CO ₂ %	O ₂ %	CO ₂ %	
4.3	9.3	3.9 - 4.7	9.1 - 9.5	

D - Combustion Setup (Low-Fire)

- Unscrew exhaust port plug at exhaust flue test port.
- Insert combustion analyzer into exhaust flue test port. Verify the opening around combustion analyzer probe is completely sealed when taking measurements.
- Set boiler to low-fire by pressing two buttons simultaneously. If the boiler is already in combustion setup mode for high fire, press the (-) button several time until L3 is displayed on the screen.
- Measure percentage of O₂ or CO₂ in flue gases.
- Compare the measured values with values in table below. Remove front panel when comparing values.
- Adjust gas/air ratio using low-fire adjustment screw (K) if needed. Turn screw clockwise to increase CO₂ level and counterclockwise to decrease it.

O ₂ /CO ₂ Values at Low-Fire Natural Gas				
Nominal	value	Permitted value		
O ₂ %	CO ₂ %	O ₂ %	CO ₂ %	
5.7	8.5	5.4 - 6.1	8.3 - 8.7	

- **18.** Resume operation using OPERATING INSTRUCTIONS found on Operating Instructions label on boiler or in Installation, Operation & Maintenance Manual.
- 19. Install front panel secure with screws.
- 20. Verify proper operation.

O ₂ /CO ₂ Values at High-Fire Propane Gas				
Nominal	value	Permitted value		
02 %	CO ₂ %	0, %	CO ₂ %	
5.7	10.0	5.4 - 6.0	9.8 - 10.2	

K - Screw cover shown.
Adjustment screw is located under cover.

O ₂ /CO ₂ Values at Low-Fire Propane Gas					
Nominal	value	Permitted value			
02 %	CO ₂ %	02 %	CO ₂ %		
6.4	9.6	6.1 - 6.70	9.4 - 9.8
