

November 14, 2019

To our Valued Partners,

We are excited to continue to broaden our product offering and are looking forward to a successful 2019-2020 heating season! Information on our new products that have been recently added to our line are listed below:

Argo Wi-Fi Thermostat

The Argo Wi-Fi Thermostat will allow homeowners to monitor their heating systems through an app that provides thermostat operation and peace of mind. The Argo Wi-Fi Thermostat will allow customers to optimize usage and efficiencies of their current boiler systems through one control. When connected to select ECR Boilers with the Artificial Intelligence [AI] control platform you can communicate with the boiler. Additional benefits include: View energy consumption, outside temperature, water pressure, and current boiler temperature, view boiler messages to confirm the boiler is operating correctly and diagnose errors. Please see the enclosed documents for more detailed information.

Multiple Boiler Control (MBC)

New for 2019, the Argo Multiple Boiler Control (MBC) operates up to four boilers to provide outdoor reset for the space heating zones. The boilers are piped in primary/secondary and the primary pumps are controlled by the MBC to allow for redundant pumping capacity as well as equal run time rotation. The MBC has an alert/combustion air damper connection which can be used as an alarm contact or to open an air damper. A flow proof/combustion air damper proof connection is provided. The MBC comes with (2) water temperature sensors and (1) outdoor sensor. Please see the accompanying price book for this new control and additional accessory information.

Argo Universal Zone Control

Argo recently introduced the Universal Zone Control (UZ3, UZ4, UZ6) - one solution for controlling your hydronic system. This new Argo device can control your zone pumps, zone valves or both! It is a perfect companion for condensing boilers with three (3) programmable end switches, allowing users to configure a condensing boiler that has multiple inputs such as central heating, DHW and low temperature zone.

You will find a copy of our price book accompanying this letter. Visit ECR International's Customer Portal at <https://www.ecrcustomerportal.com> to download price record files. If you have not signed up for this easy and convenient approach to retrieve pricing information, as well as ability to check inventory, order status, account balances and many other tools; please contact customer service at (800) 325-5479. They will be happy to provide you with a log in ID, password access and training.

If you do require printed copies, please visit the "ECR Store" found on ECR International's Customer Portal, or you may contact your Sales Representative for printed copies. Thank you for your continued business.

Sincerely,

A handwritten signature in black ink that reads "Michael P. Klas".
