

November 1, 2019

Dear Valued Customer,

In our ongoing commitment to be the leader in the hydronic heating industry, Baxi is proud to present two new products that continue in that effort. We are proactively responding to the needs of our customers by introducing the Baxi uSense Wi-Fi enabled thermostat and the Baxi Multiple Boiler Control (MBC). These new products complement and enhance our current suite of product offerings.

The uSense Wi-Fi Thermostat will allow homeowners to monitor their heating systems through an app that will give Baxi owners flexibility and peace of mind. The Baxi MBC will allow customers to optimize usage and efficiencies of their current boiler systems through one control. Please see the enclosed documents for more detailed information.

In addition, we will also now offer multiple boiler packages. Select 2,3, or 4 of our Luna Duo-tec 1.48 GA, 1.70 MP, or 1.110 MP series models coupled with a Baxi MBC, Tekmar 275 or Tekmar 284 control. If you would like a quote on a multiple Baxi boiler system job, please give us a call for special pricing on these packages.

Feel free to contact your local Baxi representative or myself with any questions you may have. Visit www.baxiboilers.com to learn more about these exciting new products.

Regards,

Roger McLaughlin
