

Dunkirk Boilers is pleased to announce that we will now feature the Taco 007e ECM circulator as the system pump in place of the 007.

This change will become effective with orders placed starting February 12, 2018.

Products that will include the Taco 007e System Pump: VLT, VX, DCC, ECR97, Q90-100, DXL, XEB, WPSB, EXB, and EW Series.

The performance of the Taco 007e is equivalent to the 007 circulator, and it provides added benefits:

- The ECM motor uses up to 85% less electricity which qualifies for high efficiency pump rebates
- SureStart function automatically frees locked rotor condition and self-purges air from the pump
- BIO Barrier® protects the pump from system contaminants

The added benefits offer a great value to our customers and will differentiate these products from our competition. Although we switched to the 007e ECM circulator, you will notice the price is unchanged from the current Taco 007.

The SKUs have been changed to reflect the new 007e. The new SKU's and Trade Prices are on the following pages. Grundfos and less pump derivatives will remain unchanged. Please be sure to download the most current version of the price book by visiting the Customer Web Portal at <https://www.ecrcustomerportal.com/login.asp>

If you have any questions, please contact your Dunkirk Representative or Dunkirk Sales Manager.

Thank you,

Karin Englert
Hydronic Product Manager
