

Dear Valued Customer,

We are excited to present the updated Dunkirk PSB, bringing forth a new appearance. The new updates to this series will include:

- A new location for factory installed pressuretrol to be able to service it without disassembling water level gauge.
- A tapped location for secondary means for manual-reset LWCO. Tapped ½” NPT at the factory. (NYC applications where a secondary manual-reset LWCO is required)
- Jacket color change with new logo treatment.
- Common accessories will include the damper, pressure relief valve, spare high temperature limit fuse and temperature/pressure gauge.

We're committed to maintaining the high quality and reliability you expect from our products.

Product brochures have been updated with the new images and are included in this announcement for your convenience.

New PSB Model

Previous PSB Model

Newly created PSB Series SKUs will be added to the excel pricing files to be downloaded from the ECR Customer Web Portal at:

<https://www.ecrcustomerportal.com>.

MODEL	NEW SKU
