

Dear Valued Customer,

Effective April 18, 2022, ECR will be implementing a new trade price sheet. Global prices continue to rise at an unprecedented rate with no leverage to reduce them. ECR has tried to minimize these increases but material costs, labor costs and domestic/international shipping is driving significant inflation across all industries we interact with. Additionally, ECR continues to see extended delivery times from our supply chain and we hope for some relief in Q3. Price increases vary across product families as noted below:

(All Brands)	Price Increase Percentages
Cast Iron Boilers – Gas	5%
Cast Iron Boilers – Oil	8%
Copper Boilers – All SKUs	5%
Condensing Boilers – All SKUs	5%
Electric Boilers & Argo Controls – All SKUs	5%
Furnaces – All SKUs	8%
H2O Indirect Water Heaters – SST – All SKUs	5%
H2O Indirect Water Heaters – Glass Lined – All SKUs	5%
All Parts	5%

Please be sure to check the new list prices when distributed per electronic file. All finished goods and repair parts pricing will be uploaded and available on your ECR International Distributor Web Portal at <https://www.ecrcustomerportal.com>.

Should you have any questions regarding these changes please do not hesitate to contact your ECR representative, Regional Sales Manager or Customer Service Representative.

Sincerely,

Bob Shea
Executive Director of Sales
ECR International, Inc.
