## **EMI - Sales Bulletin**

June 24, 2015

TO: EMI Representatives and Distributors

FROM: Joe Langlois, Marketing Manager

SUBJECT: Discontinued Manufacture of CAF Series with Comfortwave CAW 4 Pipe Introduction

As was previously communicated, the CAF series is being discontinued. The effective date will be July 31, 2015. The CAF series models can be replaced with the newly expanded CAW series product line. The CAW models are able to meet or exceed the capacities of the CAF series. The CAW ductless ceiling mounted cassettes provide both heating and cooling solutions utilizing chilled water and hydronic heating systems.

The lead time for the CAW units is 3-4 weeks. For complete product information, please refer to the individual unit specifications, installation and operation manual, and additional product literature that can be found on [www.enviromaster.com](http://www.enviromaster.com).

Should you require additional product support from EMI, please don't hesitate to contact ECR/EMI Customer Service, your area EMI Representative, or EMI regional/national sales manager.

As always thank you for your continued business and support of the EMI family of ductless and chilled water products.
