Title:	Release of LRF Low Boy Rear Flue	e Oil Furnace

Multi-pass Heat Exchanger

ECR International is pleased to introduce the LRF Series Low Boy Rear Flue Oil Furnace. This model is unique to the Lowboy series as it features a multi pass heat exchanger with 16 ga. 409 Stainless Steel primary heat exchanger and 16 ga. Aluminized steel secondary heat exchanger. The heat exchanger is a direct fire design that doesn't require a refractory and also features a low pressure drop.

The LRF is available with either a Beckett AFG, Carlin or Riello burner. There are four firing rates, 0.55, 0.65, 0.75, or 0.85 gph with AFUE efficiencies up to 86.8%. Available in Chimney Vent model only (Direct Vent will be released at a later date).

Other features include:

- All furnaces are shipped at .65 gph firing rate with all alternative nozzles supplied with furnace
- Direct Drive PSC or ECM Variable Speed blower motor option, or Belt Drive blower
- Select models are ENERGY STAR®
- Electronic fan timer
- Front access to heat exchanger. Easy to clean
- A/C Ready to 4-tons

Please see the attached sell sheet for more details and features. Below are the SKU's and trade pricing. If you have any questions, please contact your Olsen Furnace Representative or ECR Regional Sales Manager.

Thank you,

Don DeCarr Hydronic Product Manager
