

Dear Valued Customer,

We are excited to present the updated Utica Boilers PEG-F - introducing a new appearance. The new updates to this series will include:

- An integral draft hood with front flue.
- A new location for factory installed pressuretrol to be able to service it without disassembling water level gauge.
- A tapped location for secondary means for manual-reset LWCO. Tapped ½" NPT at the factory. (NYC applications where a secondary manual-reset LWCO is required)
- 2-1/2" Supply & Return with included NPT fittings. (2" supply and return piping is allowable with bushings.)
- Jacket color change with new logo treatment.
- Common accessories will include the damper, pressure relief valve, spare high temperature limit fuse and temperature/pressure gauge.

We're committed to maintaining the high quality and reliability you expect from our products. Along with the product changes, the new PEG-F will include a **12-year limited heat exchanger warranty**.

Product brochures have been updated with the new images and are included in this announcement for your convenience. The pricing will remain the same and this will be a rolling change as we transition to the new product through early fall.

New PEG Model

Previous PEG Model

Newly created PEG Series SKUs will be added to the excel pricing files to be downloaded from the ECR Customer Web Portal at:
<https://www.ecrcustomerportal.com>.
